

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

Applicant: Sarat C. Sankaran et al.

Examiner: Susanna Meinecke-Diaz

Serial No.: 09/905,258

Group Art Unit: 3692

Filed: July 12, 2001

Docket: 1285.014US1

Title: APPROACH FOR MANAGING FORECAST DATA

DECLARATION UNDER 37 C.F.R. § 1.131

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

This declaration is submitted under 37 C.F.R. § 1.131, with respect to U.S. Patent Application Serial Number 09/905,258 (the "Application") to establish conception and reduction to practice of the subject matter of the rejected claims after the publication date of the website, upon which the rejection is based.

The below undersigned declare and say as follows:

1. I am a co-inventor of the subject matter in the above-identified Application. I make this declaration to establish conception of the invention claimed in the above-identified Application in the United States at a date prior to July 12, 2001, which is the filing date of U.S. Patent Application No. 09/905,258.
2. Closedloop Solutions was founded in early 1999.
3. During the summer of 1999 and into the early fall, a technology evaluation was performed.
4. During the fall of 1999 and early 2000, a prototype software application was built. That software application allowed any number of parties to have full revenue and expense profit and loss reports (P&L's). These P&L's could be compared on a line-item basis. However, the P&L's were not hierarchical and were not multi-dimensional. Therefore, it was not the product described in the patent application with Serial No. 09/905,258.
5. Ultimately, this version of the software application was scrapped in 2000 because it was

decided that it did not meet the true business need.

6. TopLine Manager entered development in the summer of 2000. TopLine Manager was a revenue forecasting application. The inventions described and claimed in patent application Serial No. 09/905,258 were developed as part of TopLine Manager.

7. The June 19, 2000 web publication cited by the Examiner does not refer to or describe the revenue forecasting application contained in the patent application.

8. The inventions described and claimed in patent application Serial No. 09/905,258 were not offered for sale in any form more than 12 months before the patent filing.

9. I further declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true, and further that these statements are made with the knowledge that willful false statements and the like are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code, and that such willful false statements may jeopardize the validity of this application or any patent issuing thereon.
